Automated Tracing FOR Cloud Microservices

Runs anywhere - in a container, a VM or FaaS. It’s agentless. Connect every request in a transaction. Know exactly what is happening in production with payload visibility. Quickly see the problem with your distributed apps. Fix it in seconds. Move on.

With smooth onboarding and integration, getting started with Epsagon is easy. Experience the benefits of Epsagon in minutes.

- Real-Time Monitoring & Troubleshooting
  Get deep insights around performance to resolve issues faster and remediate bottlenecks.

- No Code Changes
  Immediate discovery of your application stack in less than 5 minutes.

- Visual Debugging
  Stop wasting time trying to find root-cause. Navigate apps using the automated application map.

- Faster, Better Apps
  Enhance the quality, reliability and time to market of your distributed apps.

- Improved User Experience
  Gain continuous control for better performance and customer experience.

- Scale with Confidence
  End-to-end visibility to keep pace with business demands.

Why Epsagon?

- 75% Reduction in error rates
- 5 Min. Setup
- 90% Reduction in troubleshooting time
A picture is worth a **thousand logs**

**Epsagon** Plays With...

- AWS
- Go
- Python
- Java
- Node.js
- Postgres
- Redis
- Elastic
- Spring
- AWS Step Functions
- Slack
- AWS Fargate
- AWS Lambda
- MySQL
- Cloud Functions
- Docker
- PagerDuty
- AWS ECS
- Kubernetes
- .NET
- AppSync
